Editor and Reviewer comments:

Reviewer #1:

1. The abstract has not discussed the topic of research objectives and results clearly, so readers do not understand this journal.
2. The English in parts approaches being incomprehensible so as a first step, a firm editorial hand would be needed to figure out what needs to be rethought.
3. The literature review has not explained well the theories that are related and relevant to the object of research and are well related to the study results.
4. The focus of this research can be developed for further research, both for research in Indonesia and abroad, because the research topic is very relevant to the novelty of other research related to the knowledge medicine implementationin.
5. References are good enough but still need to find the latest references so that this research becomes more up to date.

I hope you can make improvements as soon as possible and send the revised article again via this email.
